Course Code: CSA0311

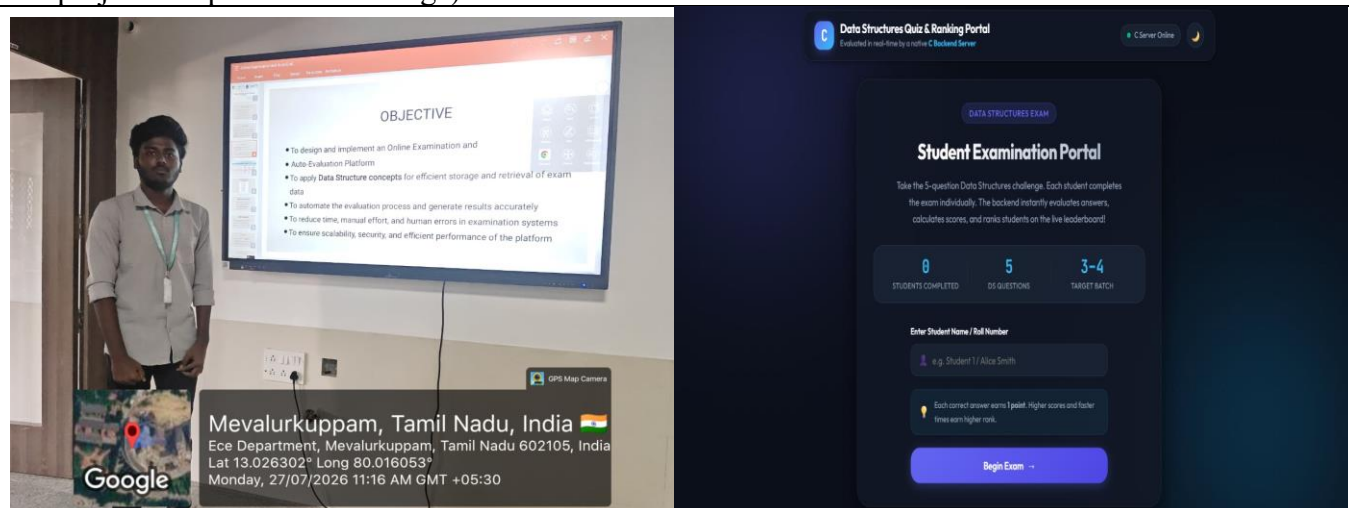

Slot:B

Course Name: Data Structures

Course Faculty: Dr.K.Kiruthika

Project Title: ONLINE EXAMINATION AND AUTO-EVALUATION PLATFORM

Module Photographs: (3 photographs –Module Photo, Individual student contribution module work in the project and presentation image)

Project Description: (here you write what you did in this project (contribution) including Model Description)

The Online Examination and Auto-Evaluation Platform is a digital system designed to conduct examinations efficiently and automatically evaluate student answers. It manages the question bank, evaluates responses by comparing them with correct answers, and processes results to generate scores and rankings. The project applies fundamental data structure concepts and sorting techniques to improve the storage, processing, and analysis of examination data. It reduces manual effort and human errors while providing instant results and performance analysis, making it a simple, reliable, and efficient solution for schools, colleges, and training institutes.
